## FOR IMMEDIATE RELEASE

### ReBLDing LLC Announces the Launch of ReBLDing.com

Santa Monica - [ReBLDing](#) is excited to announce the launch of ReBLDing.com an online platform that connects homeowners and contractors while safeguarding the entire process from beginning to end. This platform allows homeowners to post jobs, negotiate estimates and close contracts directly with contractors then allows them the ability to document the entire repair process for both parties. Contractors receive free leads unlike any other platform that charges excessive fees. Moreover, we provide contractors with marketing exposure, SEO and the ability to grow their business by being curated through ReBLDing.com as a qualified contractor.

[ReBLDing](#) knows there is a high demand for this platform not only for homeowners who want to remodel their homes but also there is a unique niche need due to the high volume of homeowner claims in recent years.

Presently, the combined average of homeowner claims and catastrophe claims per year total around 7.21 million with the numbers trending upwards. The majority of these homes have mortgage companies that require the damage be repaired with the insurance proceeds. Unfortunately, it is very difficult for homeowners to locate the right professional who can help and even when they do they encounter difficulties trying to keep track of the restoration process. [ReBLDing](#) solved these problems and more.

**[ReBLDing](#) is actively in Beta in Orange County and Riverside County with plans to expand to the rest of California by year end. We anticipate to fully launch in Florida, Texas and Kansas in first quarter of 2019.**

**[ReBLDing](#) is Creating Trust, Transparency and Timing between Homeowners and Contractors.**
